## Personal Profile

I am now a second-year master student in IMPACT Lab of ShanghaiTech University under the supervision of Prof. Zhiming Cui and Prof. Dinggang Shen. My current research interests lie in 3D/4D vision & reconstruction, neural representation and medical image reconstruction. **I've published two IEEE Transactions papers, with another two in revision/submission. I won the first prize of Ningbo Natural Science Outstanding Paper Award (ranked first, 1/130) of 2021-2022.**

## Education

### ShanghaiTech University

Shanghai, China

M.S. in Computer Science - GPA 3.71/4

Sep. 2022 - Present

- IMPACT Lab | Supervisor: Prof. Zhiming Cui, Prof. Dinggang Shen
- Research Interests: 3D/4D Vision & Reconstruction, Neural Rendering, Medical Image Reconstruction

### Ningbo University

Ningbo, China

B.E. in Communication Engineering - GPA 3.83/4, Rank 1/100

Sep. 2018 - July 2022

- VIPP Lab | Supervisor: Prof. Qiuping Jiang
- Research Interests: Human Vision Modeling, Image Quality Assessment

## Research Experience

### Sparse-view Dynamic DSA Reconstruction

Shanghai, China

IMPACT Lab | ShanghaiTech University

May 2023 - March 2024

- **Motivation:** Reconstruct high quality 3D vessel structure from a decreased number of dynamic Digital Subtraction Angiography (DSA) images (133 to 30) to reduce radiation exposure.
- **Method:** Represent the dynamic DSA imaging as a complementary weighted combination of static and dynamic attenuation fields, with the weights derived from the time-agnostic vessel probability field. Vessel probability masks out the gradients from static points, thus facilitating static-dynamic decomposition and significantly improving reconstruction quality. Two training strategies are applied to further enhance reconstruction quality: coarse-to-fine progressive training and temporal perturbed rendering loss.

### Sparse-view CBCT Reconstruction

Shanghai, China

IMPACT Lab | ShanghaiTech University

Sep. 2022 - March 2023

- **Motivation:** Reconstruct high quality 3D Cone-beam Computed Tomography (CBCT) image from a decreased number of X-ray images (500 to 20 or less) to reduce radiation exposure.
- **Method:** Develop a geometry-aware encoder-decoder framework to reconstruct 3D CBCT image from multi-view 2DX-rays. Leveraging the inherent CBCT scanning geometry and prior knowledge from data population, our method provides high-quality and efficient reconstructions.

### JND Profile Estimation

Ningbo, China

VIPP Lab | Ningbo University

April 2021 - Aug. 2021

- **Motivation:** Develop an accurate Just Noticeable Difference (JND) estimation model aligning with human perception system.
- **Method:** Instead of traditional explicitly formulating and fusing different masking effects in a bottom-up way, the proposed JND estimation model employs a totally different top-down design philosophy. It first predicts a critical perceptual lossless (CPL) counterpart of the original image based on KLT transformation and then calculates the difference map between the original image and the predicted CPL image as the JND map.

### SISR Images Quality Assessment

Ningbo, China

VIPP Lab | Ningbo University

July 2020 - April 2021

- **Motivation:** Try to fairly compare different Single Image Super-Resolution (SISR) algorithms performance in real-world scenarios.
- **Method:** First, we construct a real-world SISR quality dataset and conduct human subjective studies to compare the performance of the representative SISR algorithms. Second, we propose a new objective metric based on KLT transformation to evaluate the quality of SISR images in a no-reference manner.

## Publications

### JOURNAL ARTICLES

#### 3D Vessel Reconstruction from Sparse-View Dynamic DSA Images via Vessel Probability Guided Attenuation Learning

Zhentao Liu, Huangxuan Zhao, Wenhui Qin, Zhenghong Zhou, Xinggang Wang, Wenping Wang, Xiaochun Lai, Chuansheng Zheng, Dinggang Shen, Zhiming Cui.

IEEE Transactions on Pattern Analysis and Machine Intelligence, 2024. (In Submission)

#### Geometry-Aware Attenuation Field Learning for Sparse-View CBCT Reconstruction

Zhentao Liu, Yu Fang, Changjian Li, Han Wu, Yuan Liu, Dinggang Shen, Zhiming Cui.

IEEE Transactions on Medical Imaging, 2023. (Major Revision)

**Towards Top-Down Just Noticeable Difference Estimation of Natural Images**

Qiuping Jiang<sup>†</sup>, **Zhentaο Liu<sup>†</sup>**, Shiqi Wang, Feng Shao, Weisi Lin. (<sup>†</sup>equal contribution)  
*IEEE Transactions on Image Processing*, 2022.

**Single Image Super-Resolution Quality Assessment: A Real-World Dataset, Subjective Studies, and An Objective Metric**

Qiuping Jiang, **Zhentaο Liu\***, Ke Gu, Feng Shao, Xinfeng Zhang, Hantaο Liu, Weisi Lin. (\*corresponding author)  
*IEEE Transactions on Image Processing*, 2022.

**CONFERENCE PROCEEDINGS**

**TeethDreamer: 3D Teeth Reconstruction from Five Intra-oral Photographs.**

Chenfan Xu<sup>†</sup>, **Zhentaο Liu<sup>†</sup>**, Yuan Liu, Yulong Dou, Jiamin Wu, Jiepeng Wang, Minjiao Wang, Dinggang Shen, Zhiming Cui.  
*International Conference on Medical Image Computing and Computer Assisted Intervention (MICCAI)*, 2024. (In Submission)

**Performance Analysis of Implicit Neural Representation for Clinical CT Imaging.**

Wenhui Qin, **Zhentaο Liu**, Xiaopeng Yu, Mengqing Su, Yang Yang, Yikun Zhang, Yuyao Zhang, Zhiming Cui, Yang Chen, Xiaochun Lai.  
*International Conference on Medical Image Computing and Computer Assisted Intervention (MICCAI)*, 2024. (In Submission)

**Multi-View Vertebra Localization and Identification from CT Images.**

Han Wu, Jiadong Zhang, Yu Fang, **Zhentaο Liu**, Nizhuan Wang, Zhiming Cui, Dinggang Shen.  
*International Conference on Medical Image Computing and Computer Assisted Intervention (MICCAI)*, 2023.

**Patents**

---

**A Top-Down method for Just Noticeable Difference Estimation of Natural Images**

**Zhentaο Liu**, Qiuping Jiang.  
*China Invention Patent*.

**A Super-Resolution Image Quality Assessment Method based on KLT Transformation**

Qiuping Jiang, **Zhentaο Liu**.  
*China Invention Patent*.

**Awards**

---

2021-2022	<b>Ningbo Natural Science Outstanding Paper Award</b> , First Prize, Ranked First, 1/130	Ningbo, China
2019-2020	<b>Scholarship of Zhejiang Province</b>	Ningbo, China
2018-2019	<b>Scholarship of Zhejiang Province</b>	Ningbo, China

**Skills**

---

<b>Programming</b>	Python, Matlab
<b>Research Tools</b>	PyTorch, MeshLab, ITK-SNAP, 3D Slicer, Notion, LaTeX, CUDA
<b>Languages</b>	Chinese (native), English (fluent)
